### **IEM Receives ISO9001:2008 Certification**

Fremont, CA, July, 2010 – Industrial Electric Mfg.™ (IEM), the largest independent full-line manufacturer of electrical and power quality equipment in the U.S., has received ISO 9001:2008 certification for its Quality Management System. IEM builds all of its switchgear, control systems and custom assemblies in a single facility utilizing a unique parallel manufacturing process that incorporates ISO standards in its approach.

The audit and certification was conducted by NSF International Strategic Registrations, an accredited registrar that performs assessments of management systems against the requirements of national and international standards for quality.

“Achieving ISO 9001:2008 certification is an important milestone for IEM. This certification formally acknowledges systems we’ve had in place for a long time and illustrates to our customers the strong commitment to quality we have at all levels of our organization,” said Ed Rossi, president and CEO. “Customers want to be confident that they are doing business with an organization that can meet or exceed their needs in a timely manner. Demonstrating compliance with globally recognized quality management standards is a clear sign that we are devoted to continually improving our quality management systems.”

### **About IEM**

Headquartered in Fremont, CA, IEM ([www.iemfg.com](http://www.iemfg.com)) is the largest independent full-line manufacturer of electrical distribution and power quality equipment in the U.S. For over half a century, IEM has delivered customer-specific solutions to meet the ever changing power requirements of growth industries in North America. At IEM, tradition and technology still drive innovation. An experienced engineering staff and one of the most flexible design and manufacturing systems in the industry set IEM apart from standard product manufacturers.

### **About NSF**

NSF International is the world leader in standards development, product certification, education, and risk-management. For 65 years, NSF has been committed to public health, safety, and protection of the environment. NSF develops national standards, provides learning opportunities, and provides third-party conformity assessment services while representing the interests of all stakeholders. Primary stakeholder groups include industry, the regulatory community, and the public at large.

**Tradition. Technology. Innovation.**
